## BYOD - LEARNING

### “LEARNING AT ANY TIME, AT ANY PLACE VIA ANY DEVICE”

Reference Number: 2021-1-PL01-KA220-SCH-000034458

Issue No 2

## The BYOD-Learning Project

aims to introduce a new and innovative approach for the teachers and students in Math education to follow and to use as additional teaching material.

### First things first: Kick Off Meeting 28/02/-01/03/2022 in Poland

The Kick Off Meeting took place in Krakow, where partners met in order to get to know the key persons of each partner organization and discuss the timeline of the activities, as well as reminder of the roles and responsibilities of each partner.

During the first transnational meeting the participants introduced the number and profile of teachers/researchers that will be involved, so that additional arrangements could be made according to the profile of the organization, available staff and their expertise. The contents of each of the results were discussed as well.

### Second Transnational Meeting 10/09/2022 in Bulgaria

The Second Transnational Meeting took place in Plovdiv early in September. This is the period when the first results were in the last phase of preparation, and in progress with second result so its implementation was discussed, adjustments were made to optimize the results, and evaluation on the project's progress was completed. The realization of the plan for dissemination was evaluated and further activities were discussed.

The extent to which the results are realized was discussed, as well as the activities to be undertaken in the following period. Another thing on the Agenda of the meeting was the role of each organization in filling in the form necessary for the interim report to the National Agency.

# The BYOD Learning Platform

The project's main result is the European Platform of Video Lessons hosting videos accessible by teachers, students at any time and any place and through any device. It will be dynamic allowing its continuous growth and updating with more subjects, levels and languages.

General Aims: Didactic concepts, teaching and learning material as well as corresponding assessment methods for mathematics education will be developed, tested, evaluated and disseminated on the European level. The BYOD Learning project uses the power of initial and in-service teacher education to put innovative pedagogical and didactical approaches into practice.

**The Platform is expected to go public on February 1st, 2023**

At this point the development of the training material is at the final stage and the platform is expected to be accessible by the general public on February 1st, 2023.

The training courses will be pilot tested as well as the platform's functionality. Based on the pilot testing notes from partners and feedback from the participants, the consortium will finalize the Training course, its methodology, training course modules and assignments.
