HOW TO MAKE A LEARNING VIDEO

IN FOUR SIMPLE STEPS

CHOOSE A TOPIC

Choose a topic that you want to cover in your video. Make sure it's something that you're knowledgeable about and that your audience will find interesting.

PLAN YOUR CONTENT

Outline the key points you want to cover in your video. Create a storyboard or a script to help organize your ideas.

Consider using visuals such as diagrams and charts to explain concepts, and examples and demonstrations to show how to solve problems.

RECORD AND EDIT YOUR VIDEO

Record your video using a high-quality camera and microphone. Edit your video to remove any mistakes or unnecessary footage. Consider adding animations to illustrate key concepts.

UPLOAD YOUR VIDEO TO THE BYOD PLATFORM

Upload your video to BYOD Platform and share it with your audience. Make sure to include a clear and descriptive title, as well as any relevant tags and descriptions.
